EXPERIENCE

Dolota

Automation of business processes

June 2025 - Present

- E-commerce Pipeline: Automated the full product lifecycle pipeline (KeyCRM → AI-generated descriptions → OpenCart publishing) achieving zero manual data entry steps.
- AI Content Generation: Integrated Make.com and OpenAI GPT API for automated bilingual (UA/EN) SEO content generation with manager-driven custom prompt adjustments.
- Performance Tracking System: Built a comprehensive KPI engine with a configurable bonus matrix, auto-archiving, and automated Telegram reporting for the sales team.
- Backend Development: Developed a server-side PHP webhook controller for OpenCart, supporting multi-language product descriptions and automated image gallery processing.
- Logistics Automation: Created a smart delivery readiness checker that automatically validates product dimensions, photos, and purchase prices prior to shipment.
- Tech Stack: Google Apps Script, PHP, Make.com, OpenAI API, KeyCRM API, Telegram Bot API, OpenCart REST, MySQL.

ConnectiveOne

AI Implementation Engineer

December 2025 – Present

- Enterprise AI & Automation: Engineered and maintained robust automation scenarios, AI agents, and Telegram bots for large-scale enterprise clients (Megogo, Glo, Velo).
- Protocols & Architecture: Implemented the Model Context Protocol (MCP) to analyze scenarios and build custom tools for the Instance Agent, automating specific platform actions.
- AI Tooling & RAG: Built internal productivity tools using Cursor AI, developed AI solutions based on Dify, and integrated VoltAgent (RAG) for advanced contextual retrieval.
- Custom Integrations: Designed custom integration modules from scratch, implementing seamless authentication and account binding workflows for Telegram bots.
- Data & Analytics: Administered relational databases (MySQL, DBeaver) and configured BI dashboards in Metabase to monitor and optimize internal processes.
- Quality Assurance (QA): Refactored legacy automation scenarios and created specialized AI tools to accelerate QA processes based on strict rules.
- Tech Stack: JavaScript, MCP, Dify, RAG, Metabase, MySQL, Docker, Cursor AI.

EDUCATION

2024-2026

Scrimba

Courses "Learn JavaScript", "Learn React" and "Introduction to ES6+", "Learn SQL"

2025

Vadym AI

Course "Automate routine tasks with AI"
Make.com, AI integration, APIs

2023 - 2027

LNUVMB named after S.Z. Gzhytskyi

Bachelor's Degree in Automation of
Computer-Integrated Technologies and
Robotics

C++

2022

Sigma Software University

Course Interesting Front-end
HTML / CSS, Java Script
